Gear 4	7	12
Gear 5	10	15
Full Velocity	12	20

By the Numbers

Here is an example of how the numbers work inside the FV system.

For example, if an account posts a net profit of \$1,000 in a month, then that profit is distributed as follows:

- \$700 goes to the user (70% of the profit)
- \$270 goes to the referring partners (27% of the profit) paid to the FV Unilevel
- \$30 goes to FV (3% of the profit)

Depending on which level the user falls on in your organization will determine the percentage that is paid out to you.

If the example above was on your Level 1 you would earn 25%, Level 2 you would earn 10%, Level 6 5% and ect, of the \$270 that is distributed to the referring partners. Imagine having 20 levels of people you can earn from!
